

MULTI-TANK TRAILERS

460 | 690 | 920 GALLONS

NO CDL. NO HAZMAT. NO PROBLEM.

The Multi-Tank Trailer from Thunder Creek is the first fuel and service trailer to legally mitigate the need for the driver to have a HAZMAT endorsement.* In many cases, a CDL is also not required.

The trailers can be configured with our patented four, six or eight non-spec, 115 gallon fuel tanks. Each tank stands alone as a DOT compliant, non-bulk, diesel fuel tank capable of being transported without a HAZMAT. Tanks are joined via a manifold to a common pump allowing for complete isolation during transport as well as controlled dispensing of fuel at the job site. A new electric valve manifold option automatically closes the manifold to ensure DOT Compliance without operator intervention.

These trailers can now be equipped with a new gas powered pump option, as well as the popular rear utility box and 100 gallon DEF system. This patent-pending closed DEF system is fully ISO-compliant to maintain DEF purity and protect Tier 4 equipment.

*Per the Code of Federal Regulations, Title 49 (CFR49). The Multi-Tank Trailer specifically uses independent non-bulk packaging for the transportation of combustible liquids in the U.S. Contact us for details about state regulations.
